Internship

Python Full Stack Developer Virtual Intern **Jan 2026- Feb 2027**

- Developed full-stack web applications during AICTE Python Full Stack internship, improving application functionality by building responsive frontends and integrating backend APIs using Python frameworks.
- Streamlined user experience and application performance by designing dynamic UI components and optimizing server-side logic.
- Strengthened end-to-end development skills by implementing Restful APIs, database integration, and frontend-backend connectivity.

RCPL | Data Structure & Algorithms **May2025-July2025**

- Strengthened critical thinking skills by completing a Data Structures & Algorithms internship at RCPL, applying concepts like arrays, linked lists, stacks, and trees in coding tasks.
- Boosted coding efficiency and logic-building ability by solving algorithmic problems involving sorting, searching, and recursion.
- Built a solid foundation in time and space complexity by analyzing and optimizing solutions for better performance.
- Enhanced debugging and analytical skills by implementing and testing multiple data structure operations in real-world scenarios.

Projects

Local Help Finder App **Jan 2026- Feb 2027**

- Developed a Local Help Finder web application, improving access to nearby services by enabling users to instantly search and connect with local helpers through a user-friendly interface.
- Enhanced user engagement and usability by implementing responsive design and efficient search/filter functionality for faster results.
- Optimized application performance and reliability by integrating backend services and optimizing data retrieval processes.

Group Expense Tracker **Dec 2025- Feb 2026**

Developed a Group Expense Tracker web application, improving expense management accuracy by enabling real-time and offline data storage using Firebase and local storage.

- Enhanced user convenience and data accessibility by implementing dual storage (local + cloud), allowing seamless tracking with and without internet connectivity.
- Increased application reliability and user experience by designing efficient data synchronization between local storage and Firebase database.

Certifications

- RCPL | Data Structure & Algorithms
- Python Full Stack Developer Virtual Intern

Technical Skills

Languages C++, Python, Html, CSS, JavaScript.

Technologies/Frameworks: Tailwind, ReactJS, NodeJS, Git, GitHub.

Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design.

Education

Gulzar Group of Institution **2023– 2027**

Computer Science and Engineering—CGPA:7.3 *Khanna, Punjab*

Government Senior Secondary School (Multipurpose) **2021 – 2022**

12th with Science—Percentage:77.8 % *Ludhiana, Punjab*

Desh Bhagat Public Senior Secondary School **2019– 2020**

10thwithScience—95% *Ludhiana, Punjab*
